COCA Updates are disseminated biweekly. More frequent distributions occur when there is emergency information or CDC event-specific updates to share. The next COCA Update is scheduled for May 21st. This issue contains information from April 23 – May 07, 2012 and guidance documents relevant to current public health events. For questions about these or other clinical issues, please write to us at coca@cdc.gov.

COCA News and Announcements

**Upcoming COCA Webinar:** Improving Disaster Planning in Nursing Homes and Home Health Agencies

**Date:**  *Tomorrow*: May 8, 2012

**Time:**  2:00 – 3:00 PM (Eastern Daylight Time)

**Call Number:**  1-888-790-6180

**Passcode:**  1281914

**Join the webinar at:**  [http://emergency.cdc.gov/coca/calls/2012/callinfo_050812.asp](http://emergency.cdc.gov/coca/calls/2012/callinfo_050812.asp)

CDC’s Office of Public Health Preparedness and Response funds Preparedness and Emergency Response Research Centers (PERRCs) to examine the organization, function, capacity, and performance of components in the public health system in preparing for and responding to all potential threats and hazards. The Emory University PERRC conducted a study examining disaster preparedness in nursing homes and home health agencies. Although nursing homes and home health agencies care for over 2 million patients, they typically have not been included in disaster planning efforts. Please join us for this COCA call where subject matter experts will share findings from their study and discuss strategies to incorporate nursing homes and home health agencies into community-wide disaster planning.

Archived COCA Conference Calls are available at: [http://emergency.cdc.gov/coca/callinfo.asp](http://emergency.cdc.gov/coca/callinfo.asp)

Free CE credit/contact hours (CME, CNE, ACPE, CEU, CECH, and AAVSB/RACE) are available for most COCA calls.

CDC News and Announcements

Did You Know?
“Did You Know?” is a weekly feature from the Office for State, Tribal, Local and Territorial Support to highlight prevention activities. The series features research and program activity from CDC. Please access, use, and share this information broadly with your colleagues and partners.
http://www.cdc.gov/stltpublichealth/didyouknow/index.html

CDC Scienceclips: Volume 4 – May 01 (CDC)
Each week, to enhance awareness of emerging scientific knowledge, selected science clips will be posted for the public health community. The focus is applied public health research and prevention science that has the capacity to improve health now.

Public Health Preparedness

HHS Secretary Sebelius statement on National High Blood Pressure Education Month – May 02 (HHS)
May is National High Blood Pressure Education Month and Stroke Awareness Month. It makes sense to observe both in the same month because when you control your blood pressure, you reduce your risk of stroke—the fourth leading cause of death in the United States. Unfortunately, 1 in 3 U.S. adults—an estimated 68 million of us—have high blood pressure, also called hypertension. This “silent killer” can damage the heart, brain, and kidneys without a single symptom.

May is Asthma Awareness Month – Apr 30 (CDC)
Learn to control your asthma. http://www.cdc.gov/Features/AsthmaAwareness/

Emergency Preparedness and Response (CDC)

Meningococcal Disease: Help Prevent It – Apr 23 (CDC)
Meningococcal disease is a serious, vaccine-preventable infection. The meningococcal conjugate vaccine is recommended for all 11-18 year olds. Kids should get this vaccine at 11-12 years of age and a booster dose at age 16.  
http://www.cdc.gov/Features/Meningococcal/

Travel Safety

Travel Safety

Travel Warnings are issued when long-term, protracted conditions that make a country dangerous or unstable lead the State Department to recommend that Americans avoid or consider the risk of travel to that country. A Travel Warning is also issued when the U.S. Government’s ability to assist American citizens is constrained due to the closure of an embassy or consulate or because of a drawdown of its staff.

Food, Drug and Device Safety

FoodSafety.gov Reports FDA and USDA Food Recalls, Alerts, Reporting & Resources – May 03 (HHS/USDA/FDA/CDC/NIH)
For recalls and alerts by both FDA and USDA, or to report a problem or make inquiries, visit FoodSafety.gov. 
http://www.foodsafety.gov/index.html

FDA Unit Mobilizes for Emergency Response – May 05 (FDA)
In a crisis like the outbreak of Salmonella Bareilly tied to consumption of spicy tuna sushi, FDA’s urgent-response team shifts into high gear. A special unit called the Incident Management Group works from FDA’s Emergency Operations Center, bringing together experts from local, state and federal agencies to protect consumers during outbreaks and other crises.  
http://www.fda.gov/ForConsumers/ConsumerUpdates/ucm302779.htm

**Update:** Multistate Outbreak of *Salmonella* Bareilly Infections Associated with a Raw Scraped Ground Tuna Product – May 02 (CDC)

CDC is collaborating with public health officials in many states and the U.S. Food and Drug Administration (FDA) to investigate a multistate outbreak of *Salmonella* serotype Bareilly infections. *Salmonella* Bareilly is an unusual serotype of *Salmonella*.

http://www.cdc.gov/salmonella/bareilly-04-12/index.html

**Be Food Safe: Protect Yourself from Food Poisoning – Apr 30 (CDC)**

Most people don't think about food safety until they or someone they know gets sick from eating contaminated food. It can happen to anyone. Foodborne illness, sometimes called food poisoning, is a common, costly—yet preventable—public health problem. Each year, about 1 in 6 Americans (or 48 million people) gets sick, 128,000 are hospitalized, and 3,000 die of foodborne diseases. With the recent high-profile outbreaks of *Salmonella* in raw ground tuna and *Listeria* on cantaloupes, food safety is fresh in our minds.

http://www.cdc.gov/Features/BeFoodSafe/

**Diamond Pet Foods Expands Voluntary Recall to Include Diamond Puppy Formula due to Possible *Salmonella* Contamination – Apr 30 (FDA)**

Diamond Pet Foods is expanding a voluntary recall to include Diamond Puppy Formula dry dog food. The company took this precautionary measure because sampling revealed *Salmonella* in the product. No dog illnesses have been reported.

http://www.fda.gov/Safety/Recalls/ucm302514.htm

**FDA approves new antibacterial treatment for plague – Apr 27 (FDA)**

The U.S. Food and Drug Administration approved Levaquin (levofloxacin) to treat patients with plague, a rare and potentially deadly bacterial infection. The agency also approved the drug to reduce the risk of getting plague after exposure to *Yersinia pestis*, the bacterium that causes the disease.

http://www.fda.gov/NewsEvents/Newsroom/PressAnnouncements/ucm302220.htm

**Statement by USDA Chief Veterinary Officer John Clifford Regarding a Detection of Bovine Spongiform Encephalopathy (BSE) in the United States – Apr 24 (USDA)**

USDA Chief Veterinary Officer John Clifford today released the following statement on the detection of BSE in the United States: "As part of our targeted surveillance system, the U.S. Department of Agriculture's (USDA) Animal and Plant Health Inspection Service (APHIS) has confirmed the nation's fourth case of bovine spongiform encephalopathy (BSE) in a dairy cow from central California. The carcass of the animal is being held under State authority at a rendering facility in California and will be destroyed. It was never presented for slaughter for human consumption, so at no time presented a risk to the food supply or human health. Additionally, milk does not transmit BSE.

**Updated: FDA Issues Second Warning to Physicians about Certain Compounded Drugs from Franck's – (FDA)**

Serious fungal eye disease from contaminated products investigated by @CDCgov mycologists and partners in 7 states. http://www.fda.gov/Drugs/DrugSafety/ucm301027.htm"

---

The Emergency Risk Communication Branch (ERCB) Clinician Communication Team (CCT) works to enhance partners' knowledge of emerging threats and their effects on human populations, and to provide relevant, timely information to help manage these threats by developing and maintaining mechanisms for communication. The Clinician Communication Team is responsible for the management of all COCA products.

For information on this and other clinical issues or to send your feedback please contact us at coca@cdc.gov
ERCB offers a variety of free tools and resources to help you enhance your knowledge of emergency preparedness and response:

- **CDC Health Partners Outreach Facebook page** - real time updates, guidance, and situational awareness for public health partners on Facebook.
- **Clinician Outreach and Communication Activity** – resources for Healthcare providers.
- **Subscribe the COCA RSS Feed** - get notified of conference calls, updates, and CDC guidance for health providers.
- **Crisis & Emergency Risk Communication (CERC) Training** - course on the fundamentals of CDC’s Crisis & Emergency Risk Communication.
- **Selective National Assessment Profiles (SNAPS)** - snapshots of state population data and local-level community profile information.
- **Risk Communicator** – quarterly online newsletter providing guidance for emergency risk communication strategy.
