

# COCA Update

Clinician Outreach and Communication Activity (COCA)  
CDC Emergency Communication System

February 24, 2014

**COCA Updates** are disseminated biweekly. More frequent distributions occur when there is emergency information or CDC event-specific updates to share. The next COCA Update is scheduled for **March 10**.

This issue contains information from **February 10 – February 24** and guidance documents relevant to current public health events.

For questions about these or other clinical issues, please write to us at [coca@cdc.gov](mailto:coca@cdc.gov).

## COCA News and Announcements

#### Recent COCA Call/Webinar:

#### **Chikungunya Virus – An Emerging Threat to the Americas**

**Date:** Tuesday, February 18, 2014

Chikungunya virus is a mosquito-borne virus that can cause fever and severe polyarthralgia. Outbreaks of the chikungunya have occurred in countries in Africa, Asia, Europe, and the Indian and Pacific Oceans. In late 2013, the first local chikungunya virus transmission in the Americas was reported on islands in the Caribbean. Travelers to areas with ongoing outbreaks are at risk of becoming infected and spreading the virus to new areas, including the United States. During this COCA call, a CDC subject matter expert provided information on chikungunya virus epidemiology, clinical findings, diagnosis, treatment, and prevention. Additionally, they described the importance of early recognition and reporting of suspected cases to mitigate the risk of local transmission.

### **Food and Water Needs: Preparing for a Disaster or Emergency – (CDC)**

<http://emergency.cdc.gov/disasters/foodwater/prepare.asp>

### **Health and Safety Concerns for All Disasters – (CDC)**

<http://emergency.cdc.gov/disasters/alldisasters.asp>

## **Morbidity and Mortality Weekly Report (MMWR)**

MMWR publications are prepared by the CDC. To electronically subscribe, go to

<http://www.cdc.gov/mmwr/mmwrsubscribe.html>

### **February 7, 2014 / Vol. 63 / No. 5 [Download .pdf document of this issue](#)**

- [Interim Estimates of 2013–14 Seasonal Influenza Vaccine Effectiveness — United States, February 2014](#)
- [Influenza-Associated Intensive-Care Unit Admissions and Deaths — California, September 29, 2013–January 18, 2014](#)
- [Notes from the Field: Varicella-Associated Death of a Vaccinated Child with Leukemia — California, 2012](#)
- [Follow-Up of Infants Diagnosed with HIV — Early Infant Diagnosis Program, Francistown, Botswana, 2005–2012](#)

## **Infectious, Vector-Borne and Zoonotic Diseases**

### **NEW: HHS funds drug for bioterrorism, antimicrobial-resistant infections – February 5 (HHS)**

A new drug to help protect the public against two bioterrorism threats and provide a new option to treat antibiotic-resistant infections will advance in development under a public-private partnership.

<http://www.hhs.gov/news/press/2014pres/02/20140205b.html>

### **Avian Influenza A (H7N9) Virus**

#### **Update: Avian Influenza A (H7N9) Virus – February 21 (CDC)**

Human infections with a new avian influenza A (H7N9) virus continue to be reported in China. The virus has been detected in poultry in China as well. While mild illness in human cases has been seen, most patients have had severe respiratory illness and some people have died. No cases of H7N9 outside of China have been reported.

<http://www.cdc.gov/flu/avianflu/h7n9-virus.htm>

### **Seasonal Influenza**

### **Weekly Flu View – February 15 (CDC)**

This is a weekly influenza surveillance report prepared by CDC Influenza Division. All data are preliminary and may change as CDC receives more reports.

<http://www.cdc.gov/flu/weekly/>

### **Planning and Preparedness: Health Professionals and Seasonal Flu – (HHS)**

Health care providers play an important role during flu season. The following guidance and information will assist health care providers and service organizations to plan and respond to seasonal flu.

<http://www.flu.gov/planning-preparedness/hospital/index.html>

## **Travel Safety**

### **Current Travel Warnings – February 24 (US Department of State)**

Travel Warnings are issued when long-term, protracted conditions that make a country dangerous or unstable lead the State Department to recommend that Americans avoid or consider the risk of travel to that country. A Travel Warning is also issued when the U.S. Government's ability to assist American citizens is constrained due to the closure of an embassy or consulate or because of a drawdown of its staff.

---

The Emergency Risk Communication Branch (ERCB) Clinician Communication Team works to enhance partners' knowledge of emerging threats and their effects on human populations, and to provide relevant, timely information to help manage these threats by developing and maintaining mechanisms for communication. The Clinician Communication Team is responsible for the management of all COCA products.

**For information on this and other clinical issues or to send your feedback please contact us at [coca@cdc.gov](mailto:coca@cdc.gov)**

ERCB offers a variety of free tools and resources to help you enhance your knowledge of emergency preparedness and response:

[CDC Health Partners Outreach Facebook page](#) - real time updates, guidance, and situational awareness for public health partners on Facebook.

[Clinician Outreach and Communication Activity](#) – resources for health care providers.

[Subscribe the COCA RSS Feed](#) - get notified of conference calls, updates, and CDC guidance for health providers.

[Crisis & Emergency Risk Communication \(CERC\) Training](#) - course on the fundamentals of CDC's Crisis & Emergency Risk Communication.

[Health Alert Network \(HAN\)](#) - CDC's primary method of sharing cleared information about urgent public health incidents with public information officers; federal, state, territorial, and local public health practitioners; clinicians; and public health laboratories.
