

## Emergency Responder Health Monitoring and Surveillance: Implementation Training

### Take it Home Worksheet

This worksheet will guide you in assessing whether your organization's processes for monitoring the health of emergency responders are aligned with the ERHMS framework for maintaining high standards of responder safety and health. As you complete a section in the course, complete the corresponding section in this worksheet.

### Deployment

<b>ERHMS Key Component</b> <b>Deployment</b> <b>On-Site Responder In-Processing</b>	<b>These procedures are currently in place in my organization</b>	<b>My organization's current procedures don't meet the ERHMS standard</b>	<b>Actions needed to address ERHMS standard and improve my organization.</b>	<b>Resources needed</b>	<b>Person or department primarily responsible</b>
Prior to incidents, my organization works to establish relationships with potential deployment sister organizations to ensure on-site in-processing goes smoothly.					
My organization's responders complete in-processing immediately upon arrival on the scene.					
Personnel in my organization are trained in proper PPE usage.					

## Emergency Responder Health Monitoring and Surveillance: Implementation Training

<b><u>ERHMS Key Component</u></b> <b>Deployment</b> <b>Health Monitoring and Surveillance</b>	<b>These procedures are currently in place in my organization</b>	<b>My organization's current procedures don't meet the ERHMS standard</b>	<b>Actions needed to address ERHMS standard and improve my organization.</b>	<b>Resources needed</b>	<b>Person or department primarily responsible</b>
My organization has a system in place to monitor responders during an incident.					
My organization has system in place to conduct surveillance during an incident.					

## Emergency Responder Health Monitoring and Surveillance: Implementation Training

<b><u>ERHMS Key Component</u></b> <b>Deployment</b> <b>Integrating Exposure Assessment</b> <b>Activities, Documentation and Controls</b>	<b>These</b> <b>procedures are</b> <b>currently in</b> <b>place in my</b> <b>organization</b>	<b>My organization's</b> <b>current procedures</b> <b>don't meet the</b> <b>ERHMS standard</b>	<b>Actions needed to address</b> <b>ERHMS standard and</b> <b>improve my organization.</b>	<b>Resources needed</b>	<b>Person or</b> <b>department</b> <b>primarily</b> <b>responsible</b>
There are personnel in my organization who are trained to document exposure assessment.					
My organization has a process of exposure assessment documentation developed and ready to use.					
My organization has a system for determining the acceptability of various types and levels of exposures.					

## Emergency Responder Health Monitoring and Surveillance: Implementation Training

<b><u>ERHMS Key Component</u></b> <b>Deployment</b> <b>Communication of Health Monitoring and Surveillance</b>	<b>These procedures are currently in place in my organization</b>	<b>My organization's current procedures don't meet the ERHMS standard</b>	<b>Actions needed to address ERHMS standard and improve my organization.</b>	<b>Resources needed</b>	<b>Person or department primarily responsible</b>
My organization has a system in place to communicate exposure and health data to authorized officials, monitoring and surveillance analysts, and the responders themselves, as appropriate.					
My organization has secure storage available for exposure and health data, and a system to prevent unauthorized access.					
My organization has communicates exposure risk to individual responders.
