

Emergency Responder Health Monitoring and Surveillance: Implementation Training

Take it Home Worksheet

This worksheet will guide you in assessing whether your organization's processes for monitoring the health of emergency responders are aligned with the ERHMS framework for maintaining high standards of responder safety and health. As you complete a section in the course, complete the corresponding section in this worksheet.

Pre-Deployment

<u>ERHMS Key Component</u> Pre-Deployment Rostering and Credentialing	These procedures are currently in place in my organization	My organization's current procedures don't meet the ERHMS standard	Actions needed to address ERHMS standard and improve my organization.	Resources needed	Person or department primarily responsible
Rostering and credentialing information is collected from each emergency responder when the responder first joins the organization.					
Rostering and credentialing information is updated on a regular basis.					
Rostering and credentialing data is stored in a secure manner.					

Emergency Responder Health Monitoring and Surveillance: Implementation Training

<u>ERHMS Key Component</u> Pre-Deployment Health Screening	These procedures are currently in place in my organization	My organization's current procedures don't meet the ERHMS standard	Actions needed to address ERHMS standard and improve my organization.	Resources needed	Person or department primarily responsible
Pre-deployment health screening is conducted by a licensed health care professional on all personnel who are eligible for deployment.					
Health screenings are reviewed periodically.					
Health screening record data is stored securely.					
<u>ERHMS Key Component</u> Pre-Deployment Health and Safety Training	These procedures are currently in place in my organization	My organization's current procedures don't meet the ERHMS standard	Actions needed to address ERHMS standard and improve my organization.	Resources needed	Person or department primarily responsible
Health and safety training is provided to each emergency responder when the responder first joins the organization.					
Health and safety training is updated on a regular basis.					
Records are securely maintained and released only to authorized personnel.					

Emergency Responder Health Monitoring and Surveillance: Implementation Training

<u>ERHMS Key Component</u> Pre-Deployment Data Management and Information Security	These procedures are currently in place in my organization	My organization's current procedures don't meet the ERHMS standard	Actions needed to address ERHMS standard and improve my organization.	Resources needed	Person or department primarily responsible
My organization has a secure means of storing and transmitting information.					
My data management system is set up to include responder's rostering & credentialing information, and health & safety screening information.					
Responsible individuals are in charge of securing the information and updating it on a regular basis.
